Subject: 23rd Street improvements

Fernando:

Can you give me a status on any planned 23rd Street improvements and more specifically a cross walk at Liberty on 23rd Street? This was a concern brought up after the new 23rd Street Bridge project was derailed. This is a dangerous intersection for pedestrians to cross with no aide. There are many people who use the walk bridge over the Collins Canal to this corner and therefore cross here to get to their destination. I know you will take a pro active stand with the County to implement this safety measure but I'd like a time line before someone is seriously injured or killed.

Thank you,

Ray Breslin, president

Collins Park Neighborhood Association
